In accordance with Article 19, new claims pages 16 to 19 are submitted in the attachment, in order to replace the original set of claims.

No statement in accordance with Article 19(1) is being issued.

The following statements should be regarded as an attached covering letter:

The original claim 1, the original claim 6 (new claim 5) and the original claim 14 (new claim 13) have been amended. The original claim 4 has been deleted. All the other original claims remain unchanged. Owing to the deletion of the original claim 4, the original claims 5 to 25 have been renumbered and matched to the

appropriate references.

In the precharacterizing clause of claim 1, the feature "conductor (4)" has been defined more precisely by the conductor being an "optical waveguide (4)". This feature is the subject matter of the original claim 4, which it has thus been possible to delete. In the characterizing part of the main claim, the feature "optical waveguide (4)" has been defined more precisely in that "the optical waveguide (4) comprises at least two fiber Bragg grating sensors". Furthermore, in the characterizing part of the claim, the fiber Bragg grating sensors are specified as the point at which the electromagnetic wave which can be injected can be influenced on the basis of the optical waveguide temperature, which is dependent on the flow rate of the fluid. These features are supported by the description relating to Figure 13 and Figure 5 in conjunction with page 11, lines 20 to 32 and page 13, line 34 to page 14, line 11. The more precise definition of the feature "conductor" as an "optical waveguide (4)" has also been adopted in a consistent manner in the original claim 6 (new claim 5). The other original independent claim 14 (new claim 13) has likewise been made more precise at the appropriate points, by analogy with the changes in the main claim 1.
